Subject Index

Volume 97, July 8–December 9/23, 2005

A

ACE2

Mineralocorticoid Receptor Blocker Increases Angiotensin-Converting Enzyme 2 Activity in Congestive Heart Failure Patients, 946

Acellular matrix

Heart Valve Tissue Engineering, 743

Acetylcholine

Rapid Endothelial Cell-Selective Loading of Connexin 40 Antibody Blocks Endothelium-Derived Hyperpolarizing Factor Dilation in Rat Small Mesenteric Arteries, 399

Acetylcholine-induced hyperpolarization

Myoendothelial Coupling Is Not Prominent in Arterioles Within the Mouse Cremaster Microcirculation In Vivo, 781

Acidosis

Expression of Slow Skeletal Troponin I in Adult Mouse Heart Helps to Maintain the Left Ventricular Systolic Function During Respiratory Hypercapnia, 70

α -Actinin

Protein Kinase C δ -Dependent Phosphorylation of Syndecan-4 Regulates Cell Migration, 674

Action potential

Excitation-Contraction Coupling in Na⁺-Ca²⁺ Exchanger Knockout Mice: Reduced Transsarcolemmal Ca²⁺ Flux, 1288

The Shape of the Electrical Action-Potential Upstroke: A New Aspect From Optical Measurements on the Surface of the Heart, 204

Adenosine

Control of Adenosine Transport by Hypoxia, 1
Equilibrative Nucleoside Transporter 1 Expression Is Downregulated by Hypoxia in Human Umbilical Vein Endothelium, 16

Adenovirus

Cardioprotective Role of the Mitochondrial ATP-Binding Cassette Protein 1, 740

Adenylyl cyclase

Regional Desensitization of β -Adrenergic Receptor Signaling in Swine With Chronic Hibernating Myocardium, 789

Adipokines

Endothelial Cell IL-8, a New Target for Adiponectin: Implications in Vascular Protection, 1216

Adiponectin

Adiponectin Inhibits Endothelial Synthesis of Interleukin-8, 1245

β -Adrenergic receptor

Crosstalk of β -Adrenergic Receptor Subtypes Through G_i Blunts β -Adrenergic Stimulation of L-Type Ca²⁺ Channels in Canine Heart Failure, 566

The Enigma of β_2 -Adrenergic Receptor G_i Signaling in the Heart: The Good, the Bad, and the Ugly, 507

Heterodimerization of β_1 - and β_2 -Adrenergic Receptor Subtypes Optimizes β -Adrenergic Modulation of Cardiac Contractility, 244

Phospholipase C ϵ Modulates β -Adrenergic Receptor-Dependent Cardiac Contraction and Inhibits Cardiac Hypertrophy, 1305

Adult stem cells

Mobilization of Bone Marrow-Derived Cells Enhances the Angiogenic Response to Hypoxia Without Transdifferentiation Into Endothelial Cells, 1027

Aging

Embryonic *even skipped*-Dependent Muscle and Heart Cell Fates Are Required for Normal Adult Activity, Heart Function, and Lifespan, 1108

Protective Effect of the *KCNMB1* E65K Genetic Polymorphism Against Diastolic Hypertension in Aging Women and Its Relevance to Cardiovascular Risk, 1360

AICAR

Adenosine Monophosphate-Activated Protein Kinase Suppresses Vascular Smooth Muscle Cell Proliferation Through the Inhibition of Cell Cycle Progression, 837

Akt

Adiponectin Inhibits Endothelial Synthesis of Interleukin-8, 1245

Cell-Signaling Evidence for Adenosine Stimulation of Coronary Smooth Muscle Proliferation via the A₁ Adenosine Receptor, 574

Gab1, SHP2, and Protein Kinase A Are Crucial for the Activation of the Endothelial NO Synthase by Fluid Shear Stress, 1236

Nuclear Targeting of Akt Enhances Ventricular Function and Myocyte Contractility, 1332

Phosphatidylinositol 3-Kinase-Akt Pathway Plays a Critical Role in Early Cardiomyogenesis by Regulating Canonical Wnt Signaling, 144

PTEN Activity Is Modulated During Ischemia and Reperfusion: Involvement in the Induction and Decay of Preconditioning, 1351

Akt ERK signaling

Vascular Neointimal Formation and Signaling Pathway Activation in Response to Stent Injury in Insulin-Resistant and Diabetic Animals, 725

Albuminuria and renal damage

Complement Activation in Angiotensin II-Induced Organ Damage, 716

Aldosterone

Aldosterone and Angiotensin II Synergistically Induce Mitogenic Response in Vascular Smooth Muscle Cells, 434

Alternative splicing

Nuclear RNA Foci in the Heart in Myotonic Dystrophy, 1152

AMP-activated protein kinase

Adenosine Monophosphate-Activated Protein Kinase Suppresses Vascular Smooth Muscle Cell Proliferation Through the Inhibition of Cell Cycle Progression, 837

AMP-Activated Protein Kinase Activates p38 Mitogen-Activated Protein Kinase by Increasing Recruitment of p38 MAPK to TAB1 in the Ischemic Heart, 872

N488I Mutation of the γ 2-Subunit Results in Bidirectional Changes in AMP-Activated Protein Kinase Activity, 323

Amyloidosis

Intrasarcoplasmic Amyloidosis Impairs Proteolytic Function of Proteasomes in Cardiomyocytes by Compromising Substrate Uptake, 1018

Angiogenesis

Endothelial Extracellular Matrix: Biosynthesis, Remodeling, and Functions During Vascular Morphogenesis and Neovessel Stabilization, 1093

Impaired CXCR4 Signaling Contributes to the Reduced Neovascularization Capacity of Endothelial Progenitor Cells From Patients With Coronary Artery Disease, 1142

Inhibition of Rho-Kinase Attenuates Hypoxia-Induced Angiogenesis in the Pulmonary Circulation, 185

Ischemic Neoangiogenesis Enhanced by β_2 -Adrenergic Receptor Overexpression: A Novel Role for the Endothelial Adrenergic System, 1182

Mobilization of Bone Marrow-Derived Cells Enhances the Angiogenic Response to Hypoxia Without Transdifferentiation Into Endothelial Cells, 1027

Novel Role of Lactosylceramide in Vascular Endothelial Growth Factor-Mediated Angiogenesis in Human Endothelial Cells, 796

Thrombopoietin Gene Transfer-Mediated Enhancement of Angiogenic Responses to Acute Ischemia, 337

Tissue-Resident Bone Marrow-Derived Progenitor Cells: Key Players in Hypoxia-Induced Angiogenesis, 955

Transgenic Overexpression of Vascular Endothelial Growth Factor-B Isoforms by Endothelial Cells Potentiates Postnatal Vessel Growth In Vivo and In Vitro, e60

Vascular Remodeling Versus Vasoconstriction in Chronic Hypoxic Pulmonary Hypertension: A Time for Reappraisal?, 95

Angiopietin

Endothelial/Pericyte Interactions, 512

Angiopietin-1

Long-Term and Sustained COMP-AngI Induces Long-Lasting Vascular Enlargement and Enhanced Blood Flow, 86

Angiotensin II

- Aldosterone and Angiotensin II Synergistically Induce Mitogenic Response in Vascular Smooth Muscle Cells, 434
- cAbl Tyrosine Kinase Mediates Reactive Oxygen Species- and Caveolin-Dependent AT₁ Receptor Signaling in Vascular Smooth Muscle: Role in Vascular Hypertrophy, 829
- Complement Activation in Angiotensin II-Induced Organ Damage, 716
- Dual Pathways for Nuclear Factor κ B Activation by Angiotensin II in Vascular Smooth Muscle: Phosphorylation of p65 by I κ B Kinase and Ribosomal Kinase, 975
- NADPH Oxidase Activity and Function Are Profoundly Greater in Cerebral Versus Systemic Arteries, 1055
- NADPH Oxidase-Derived Superoxide Anion Mediates Angiotensin II-Induced Pressor Effect via Activation of p38 Mitogen-Activated Protein Kinase in the Rostral Ventrolateral Medulla, 772
- Transcriptional Repression of ATP-Binding Cassette Transporter A1 Gene in Macrophages: A Novel Atherosclerotic Effect of Angiotensin II, e88

Animal heart failure model

- Cardiac Overexpression of the Norepinephrine Transporter Uptake-1 Results in Marked Improvement of Heart Failure, 928

Antioxidant enzymes

- Increased Atherosclerosis in Mice Lacking Apolipoprotein A-I Attributable to Both Impaired Reverse Cholesterol Transport and Increased Inflammation, 763

Apolipoprotein A-I

- An Apolipoprotein A-I Mimetic Works Best in the Presence of Apolipoprotein A-I, 1085
- Increased Atherosclerosis in Mice Lacking Apolipoprotein A-I Attributable to Both Impaired Reverse Cholesterol Transport and Increased Inflammation, 763

Apolipoprotein A1 mimetic peptide

- Inhibition of Lipopolysaccharide-Induced Inflammatory Responses by an Apolipoprotein A1 Mimetic Peptide, 236

Apolipoprotein E

- Apolipoprotein E Suppresses the Type I Inflammatory Response In Vivo, 922

Apoptosis

- Ca²⁺ Influx-Induced Sarcoplasmic Reticulum Ca²⁺ Overload Causes Mitochondrial-Dependent Apoptosis in Ventricular Myocytes, 1009
- Cardioprotective Role of the Mitochondrial ATP-Binding Cassette Protein 1, 740
- In Vivo and In Vitro Studies Support That a New Splicing Isoform of *OLR1* Gene Is Protective Against Acute Myocardial Infarction, 152
- Proapoptotic, Antimigratory, Antiproliferative, and Antiangiogenic Effects of Commercial C-Reactive Protein on Various Human Endothelial Cell Types In Vitro: Implications of Contaminating Presence of Sodium Azide in Commercial Preparation, 135
- PTEN Activity Is Modulated During Ischemia and Reperfusion: Involvement in the Induction and Decay of Preconditioning, 1351
- Reduced Wall Compliance Suppresses Akt-Dependent Apoptosis Protection Stimulated by Pulse Perfusion, 587

Arrhythmia

- Antiarrhythmic Engineering of Skeletal Myoblasts for Cardiac Transplantation, 159
- Atrial Fibrillation in KCNE1-Null Mice, 62
- Beware of Cells Bearing Gifts: Cell Replacement Therapy and Arrhythmic Risk, 99
- Ca²⁺/Calmodulin-Dependent Protein Kinase Modulates Cardiac Ryanodine Receptor Phosphorylation and Sarcoplasmic Reticulum Ca²⁺ Leak in Heart Failure, 1314
- Cardiac-Specific Loss of N-Cadherin Leads to Alteration in Connexins With Conduction Slowing and Arrhythmogenesis, 474
- Enhanced Store Overload-Induced Ca²⁺ Release and Channel Sensitivity to Luminal Ca²⁺ Activation Are Common Defects of RyR2 Mutations Linked to Ventricular Tachycardia and Sudden Death, 1173
- The Fire From Within: The Biggest Ca²⁺ Channel Erupts and Dribbles, 1213
- Intracellular Calcium Handling Dysfunction and Arrhythmogenesis: A New Challenge for the Electrophysiologist, 1077

- Targeted Deletion of Kv4.2 Eliminates I_{tot} and Results in Electrical and Molecular Remodeling, With No Evidence of Ventricular Hypertrophy or Myocardial Dysfunction, 1342

Arrhythmia induction

- Differences Between Left and Right Ventricular Chamber Geometry Affect Cardiac Vulnerability to Electric Shocks, 168

Arterial injury

- Increased Neointima Formation in Cysteine-Rich Protein 2-Deficient Mice in Response to Vascular Injury, 1323
- Vascular Remodeling in Mice Lacking the Cytoplasmic Domain of Tissue Factor, 293

Artery pulse

- Reduced Wall Compliance Suppresses Akt-Dependent Apoptosis Protection Stimulated by Pulse Perfusion, 587

Asymmetric dimethylarginine

- Asymmetric Dimethylarginine and the Risk of Cardiovascular Events and Death in Patients With Coronary Artery Disease: Results from the AtheroGene Study, e53

Atherogenesis

- Alterations in Internal Elastic Lamina Permeability As a Function of Age and Anatomical Site Precede Lesion Development in Apolipoprotein E-Null Mice, 450

Atherosclerosis

- An Apolipoprotein A-I Mimetic Works Best in the Presence of Apolipoprotein A-I, 1085
- Genetic Strategies to Elucidate the Roles of Matrix Metalloproteinases in Atherosclerotic Plaque Growth and Stability, 958
- Haplotype Effect of the Matrix Metalloproteinase-1 Gene on Risk of Myocardial Infarction, 1070
- Increased Atherosclerosis in Mice Lacking Apolipoprotein A-I Attributable to Both Impaired Reverse Cholesterol Transport and Increased Inflammation, 763
- Interleukin-10 Suppresses Tissue Factor Expression in Lipopolysaccharide-Stimulated Macrophages via Inhibition of Egr-1 and a Serum Response Element/MEK-ERK1/2 Pathway, 305
- Liver X Receptor Activation Controls Intracellular Cholesterol Trafficking and Esterification in Human Macrophages, 682
- Oral Small Peptides Render HDL Antiinflammatory in Mice and Monkeys and Reduce Atherosclerosis in ApoE Null Mice, 524
- Progesterone Antagonizes the Vasoprotective Effect of Estrogen on Antioxidant Enzyme Expression and Function, 1046
- Redox-Dependent Transcriptional Regulation, 967

ATP-binding cassette proteins

- Cardioprotective Role of the Mitochondrial ATP-Binding Cassette Protein 1, 740

ATP-binding cassette transporter A1

- Transcriptional Repression of ATP-Binding Cassette Transporter A1 Gene in Macrophages: A Novel Atherosclerotic Effect of Angiotensin II, e88

ATP-sensitive K⁺ channel

- Protein Kinase G Transmits the Cardioprotective Signal From Cytosol to Mitochondria, 329

Atrial fibrillation

- Atrial Fibrillation in KCNE1-Null Mice, 62
- A Myocardial Nox2 Containing NAD(P)H Oxidase Contributes to Oxidative Stress in Human Atrial Fibrillation, 629

Atrial myocyte

- Kv1.5 Surface Expression Is Modulated by Retrograde Trafficking of Newly Endocytosed Channels by the Dynein Motor, 363

Atrioventricular canal

- Alk3/Bmpr1a Receptor Is Required for Development of the Atrioventricular Canal Into Valves and Annulus Fibrosus, 219

Atrophy

- Cardiac Remodeling: UPS Lost in Transit, 964
- Transgenic Overexpression of Locally Acting Insulin-Like Growth Factor-I Inhibits Ubiquitin-Mediated Muscle Atrophy in Chronic Left-Ventricular Dysfunction, 418

Automaticity

- Ca²⁺ Sparks and Waves in Canine Purkinje Cells: A Triple Layered System of Ca²⁺ Activation, 35

Autonomic nerve activity

- The Regulation of Sympathetic Nerve Activity by Angiotensin II Involves Reactive Oxygen Species and MAPK, 737

B

Biomaterials

Custom Design of the Cardiac Microenvironment With Biomaterials, 8

BK channel

Protective Effect of the *KCNMB1* E65K Genetic Polymorphism Against Diastolic Hypertension in Aging Women and Its Relevance to Cardiovascular Risk, 1360

Blood flow

Gab1, SHP2, and Protein Kinase A Are Crucial for the Activation of the Endothelial NO Synthase by Fluid Shear Stress, 1236

Long-Term and Sustained COMP-Ang1 Induces Long-Lasting Vascular Enlargement and Enhanced Blood Flow, 86

PKC α Activates eNOS and Increases Arterial Blood Flow In Vivo, 482

Blood pressure

NADPH Oxidase-Derived Superoxide Anion Mediates Angiotensin II-Induced Pressor Effect via Activation of p38 Mitogen-Activated Protein Kinase in the Rostral Ventrolateral Medulla, 772

Bone marrow

Cardiac Progenitor Cells: The Revolution Continues, 1080

Mobilization of Bone Marrow-Derived Cells Enhances the Angiogenic Response to Hypoxia Without Transdifferentiation Into Endothelial Cells, 1027

Bone marrow side population cells

CD31⁺ but Not CD31⁺ Cardiac Side Population Cells Exhibit Functional Cardiomyogenic Differentiation, 52

Bone marrow-derived cells

Tissue-Resident Bone Marrow-Derived Progenitor Cells: Key Players in Hypoxia-Induced Angiogenesis, 955

Bone morphogenetic protein

Alk3/Bmp1a Receptor Is Required for Development of the Atrioventricular Canal Into Valves and Annulus Fibrosus, 219

Bone Morphogenetic Protein 4 Promotes Pulmonary Vascular Remodeling in Hypoxic Pulmonary Hypertension, 496

Bone Morphogenetic Protein Signaling Modulates Myocardial Transactivation of Cardiac Genes, 992

Bone Morphogenetic Proteins in Vascular Calcification, 105

C

C-reactive protein

Fc γ RIIB Mediates C-Reactive Protein Inhibition of Endothelial NO Synthase, 1124

Loss of Pentameric Symmetry in C-Reactive Protein Induces Interleukin-8 Secretion Through Peroxynitrite Signaling in Human Neutrophils, 690

A New Perspective on the Biology of C-Reactive Protein, 609

Ca²⁺-calmodulin-dependent myosin light chain kinase

Dual Serotonergic Regulation of Ventricular Contractile Force Through 5-HT_{2A} and 5-HT₄ Receptors Induced in the Acute Failing Heart, 268

Ca²⁺ handling

Enhanced Store Overload-Induced Ca²⁺ Release and Channel Sensitivity to Luminal Ca²⁺ Activation Are Common Defects of RyR2 Mutations Linked to Ventricular Tachycardia and Sudden Death, 1173

Paradoxical Cellular Ca²⁺ Signaling in Severe but Compensated Canine Left Ventricular Hypertrophy, 457

Ca²⁺ influx

Recent Developments in Vascular Endothelial Cell Transient Receptor Potential Channels, 853

Ca²⁺ sparks

Ca²⁺ Sparks and Waves in Canine Purkinje Cells: A Triple Layered System of Ca²⁺ Activation, 35

Paradoxical Cellular Ca²⁺ Signaling in Severe but Compensated Canine Left Ventricular Hypertrophy, 457

TRPV4 Forms a Novel Ca²⁺ Signaling Complex With Ryanodine Receptors and BK_{Ca} Channels, 1270

Ca²⁺ transients

Ca²⁺ Sparks and Waves in Canine Purkinje Cells: A Triple Layered System of Ca²⁺ Activation, 35

Enhanced Store Overload-Induced Ca²⁺ Release and Channel Sensitivity to Luminal Ca²⁺ Activation Are Common Defects of RyR2

Mutations Linked to Ventricular Tachycardia and Sudden Death, 1173

TRPV4 Forms a Novel Ca²⁺ Signaling Complex With Ryanodine Receptors and BK_{Ca} Channels, 1270

Ca²⁺ waves

Ca²⁺ Sparks and Waves in Canine Purkinje Cells: A Triple Layered System of Ca²⁺ Activation, 35

cAbl

cAbl Tyrosine Kinase Mediates Reactive Oxygen Species- and Caveolin-Dependent AT₁ Receptor Signaling in Vascular Smooth Muscle: Role in Vascular Hypertrophy, 829

Calcium

Mitochondria and Reactive Oxygen Species: An Evolution in Function, 302

Thyroid Hormone Targets Matrix Gla Protein Gene Associated With Vascular Smooth Muscle Calcification, 550

Calcium channels

Crosstalk of β -Adrenergic Receptor Subtypes Through G_i Blunts β -Adrenergic Stimulation of L-Type Ca²⁺ Channels in Canine Heart Failure, 566

The Enigma of β_2 -Adrenergic Receptor G_i Signaling in the Heart: The Good, the Bad, and the Ugly, 507

Calcium signaling

Sarco/Endoplasmic Reticulum Ca²⁺-ATPase Gene Transfer Reduces Vascular Smooth Muscle Cell Proliferation and Neointima Formation in the Rat, 488

Calcium-sensing receptor

Evidence in Favor of a Calcium-Sensing Receptor in Arterial Endothelial Cells: Studies With Calindol and Calhex 231, 391

Calhex 231

Evidence in Favor of a Calcium-Sensing Receptor in Arterial Endothelial Cells: Studies With Calindol and Calhex 231, 391

Calindol

Evidence in Favor of a Calcium-Sensing Receptor in Arterial Endothelial Cells: Studies With Calindol and Calhex 231, 391

Calmodulin kinase II

The Fire From Within: The Biggest Ca²⁺ Channel Erupts and Dribbles, 1213

Calpain

Calpain-Mediated Impairment of Na⁺/K⁺-ATPase Activity During Early Reperfusion Contributes to Cell Death After Myocardial Ischemia, 465

Calreticulin

Calreticulin Destabilizes Glucose Transporter-1 mRNA in Vascular Endothelial and Smooth Muscle Cells Under High-Glucose Conditions, 1001

New Function of Calreticulin: Calreticulin-Dependent mRNA Destabilization, 961

CaMKII

Ca²⁺/Calmodulin-Dependent Protein Kinase Modulates Cardiac Ryanodine Receptor Phosphorylation and Sarcoplasmic Reticulum Ca²⁺ Leak in Heart Failure, 1314

Targeting of a Novel Ca²⁺/Calmodulin-Dependent Protein Kinase II Is Essential for Extracellular Signal-Regulated Kinase-Mediated Signaling in Differentiated Smooth Muscle Cells, 541

cAMP

cAMP-Binding Protein Epac Induces Cardiomyocyte Hypertrophy, 1296

Carbon monoxide

Carbon Monoxide From Heme Oxygenase-2 Is a Tonic Regulator Against NO-Dependent Vasodilation in the Adult Rat Cerebral Microcirculation, e104

Cardiac allograft vasculopathy

Heat Shock Protein 27 Is Associated With Freedom From Graft Vasculopathy After Human Cardiac Transplantation, 192

Cardiac contractility

Heterodimerization of β_1 - and β_2 -Adrenergic Receptor Subtypes Optimizes β -Adrenergic Modulation of Cardiac Contractility, 244

Cardiac development

Embryonic *even skipped*-Dependent Muscle and Heart Cell Fates Are Required for Normal Adult Activity, Heart Function, and Lifespan, 1108

Cardiac electrophysiology

Atrial Fibrillation in KCNE1-Null Mice, 62

Cardiac failure

Embryonic *even-skipped*-Dependent Muscle and Heart Cell Fates Are Required for Normal Adult Activity, Heart Function, and Lifespan, 1108

Cardiac fibrosis

NAD(P)H Oxidases and TGF- β -Induced Cardiac Fibroblast Differentiation: Nox-4 Gets Smad, 850

Platelet-Derived Growth Factor D Induces Cardiac Fibrosis and Proliferation of Vascular Smooth Muscle Cells in Heart-Specific Transgenic Mice, 1036

Cardiac gap junction connexins

Enhanced Functional Gap Junction Neoformation by Protein Kinase A-Dependent and Epac-Dependent Signals Downstream of cAMP in Cardiac Myocytes, 655

Cardiac gene expression

Bone Morphogenetic Protein Signaling Modulates Myocardial Transactivation of Cardiac Genes, 992

Cardiac hypertrophy

Cardiomyocyte-Specific Knockout and Agonist of Peroxisome Proliferator-Activated Receptor- γ Both Induce Cardiac Hypertrophy in Mice, 372

Targeted Disruption of *Smad4* in Cardiomyocytes Results in Cardiac Hypertrophy and Heart Failure, 821

Cardiac progenitor cells

Cardiac Progenitor Cells: The Revolution Continues, 1080

Cardiac Stem Cells Possess Growth Factor-Receptor Systems That After Activation Regenerate the Infarcted Myocardium, Improving Ventricular Function and Long-Term Survival, 663

Restoration of Cardiac Progenitor Cells After Myocardial Infarction by Self-Proliferation and Selective Homing of Bone Marrow-Derived Stem Cells, 1090

Cardiac side population cells

CD31⁻ but Not CD31⁺ Cardiac Side Population Cells Exhibit Functional Cardiomyogenic Differentiation, 52

Cardiac stem cell

Cardiac Progenitor Cells: The Revolution Continues, 1080

Promotion of Cardiac Regeneration by Cardiac Stem Cells, 615

Cardiac valves

Heart Valve Tissue Engineering, 743

Cardiomyocyte differentiation

Phosphatidylinositol 3-Kinase-Akt Pathway Plays a Critical Role in Early Cardiomyogenesis by Regulating Canonical Wnt Signaling, 144

Cardiomyocytes

Cardiomyocyte-Specific Knockout and Agonist of Peroxisome Proliferator-Activated Receptor- γ Both Induce Cardiac Hypertrophy in Mice, 372

Genome-Wide Screening for Target Regions of Histone Deacetylases in Cardiomyocytes, 210

Glycogen Synthase Kinase 3 β Inhibits Myocardial-Dependent Transcription and Hypertrophy Induction Through Site-Specific Phosphorylation, 645

Kv1.5 Surface Expression Is Modulated by Retrograde Trafficking of Newly Endocytosed Channels by the Dynein Motor, 363

Promotion of Cardiac Regeneration by Cardiac Stem Cells, 615

Cardiomyogenesis

CD31⁻ but Not CD31⁺ Cardiac Side Population Cells Exhibit Functional Cardiomyogenic Differentiation, 52

Restoration of Cardiac Progenitor Cells After Myocardial Infarction by Self-Proliferation and Selective Homing of Bone Marrow-Derived Stem Cells, 1090

Cardiomyogenic differentiation

CD31⁻ but Not CD31⁺ Cardiac Side Population Cells Exhibit Functional Cardiomyogenic Differentiation, 52

Cardiovascular disease

Effects of D-4F on Vasodilation and Vessel Wall Thickness in Hypercholesterolemic LDL Receptor-Null and LDL Receptor/Apolipoprotein A-I Double-Knockout Mice on Western Diet, 1190

Cardiovascular risk

Asymmetric Dimethylarginine and the Risk of Cardiovascular Events and Death in Patients With Coronary Artery Disease: Results from the AtheroGene Study, e53

Protective Effect of the *KCNMB1* E65K Genetic Polymorphism Against Diastolic Hypertension in Aging Women and Its Relevance to Cardiovascular Risk, 1360

Carotid body

Targeting Arterial Chemoreceptor Over-Activity in Heart Failure With a Gas, 201

Catecholamines

Cardiac Overexpression of the Norepinephrine Transporter Uptake-1 Results in Marked Improvement of Heart Failure, 928

Caveolin-1

cAbl Tyrosine Kinase Mediates Reactive Oxygen Species- and Caveolin-Dependent AT₁ Receptor Signaling in Vascular Smooth Muscle: Role in Vascular Hypertrophy, 829

CD14⁺CD34^{low} cells

CD14⁺CD34^{low} Cells With Stem Cell Phenotypic and Functional Features Are the Major Source of Circulating Endothelial Progenitors, 314

CD31

CD31⁻ but Not CD31⁺ Cardiac Side Population Cells Exhibit Functional Cardiomyogenic Differentiation, 52

Cell adhesion

Cardiac-Specific Loss of N-Cadherin Leads to Alteration in Connexins With Conduction Slowing and Arrhythmogenesis, 474

Cell-cell junction proteins

Distinct Pathways Regulate Expression of Cardiac Electrical and Mechanical Junction Proteins in Response to Stretch, 346

Cell culture

Distinct Pathways Regulate Expression of Cardiac Electrical and Mechanical Junction Proteins in Response to Stretch, 346

Cell cycle arrest

Adenosine Monophosphate-Activated Protein Kinase Suppresses Vascular Smooth Muscle Cell Proliferation Through the Inhibition of Cell Cycle Progression, 837

Notch-Dependent Cell Cycle Arrest Is Associated With Downregulation of Minichromosome Maintenance Proteins, 102

Cell division

Potassium Channels and Proliferation of Vascular Smooth Muscle Cells, 1211

Cell proliferation

Contribution of Kv Channels to Phenotypic Remodeling of Human Uterine Artery Smooth Muscle Cells, 1280

Cell signaling

Dual Pathways for Nuclear Factor κ B Activation by Angiotensin II in Vascular Smooth Muscle: Phosphorylation of p65 by I κ B Kinase and Ribosomal Kinase, 975

Cerebral

NADPH Oxidase Activity and Function Are Profoundly Greater in Cerebral Versus Systemic Arteries, 1055

cGMP

Protein Kinase G Transmits the Cardioprotective Signal From Cytosol to Mitochondria, 329

Chemoreceptor

Gene Transfer of Neuronal Nitric Oxide Synthase to Carotid Body Reverses Enhanced Chemoreceptor Function in Heart Failure Rabbits, 260

Cholesterol homeostasis

Intermittent Hypoxia Induces Hyperlipidemia in Lean Mice, 698

Chronic coronary occlusions

Blood-Derived Progenitor Cells After Recanalization of Chronic Coronary Artery Occlusions in Humans, 735

Chronic heart failure

Transgenic Overexpression of Locally Acting Insulin-Like Growth Factor-1 Inhibits Ubiquitin-Mediated Muscle Atrophy in Chronic Left-Ventricular Dysfunction, 418

Chronic ischemic heart disease

Regional Desensitization of β -Adrenergic Receptor Signaling in Swine With Chronic Hibernating Myocardium, 789

Chronic kidney disease

Bone Morphogenetic Proteins in Vascular Calcification, 105

Collagen

NAD(P)H Oxidases and TGF- β -Induced Cardiac Fibroblast Differentiation: Nox-4 Gets Smad, 850

COMP-Ang1

Long-Term and Sustained COMP-Ang1 Induces Long-Lasting Vascular Enlargement and Enhanced Blood Flow, 86

Complement

Complement Activation in Angiotensin II-Induced Organ Damage, 716

Conditional knockout

Cardiac-Specific Loss of N-Cadherin Leads to Alteration in Connexins With Conduction Slowing and Arrhythmogenesis, 474

Conduction velocity

Optical Action Potential Upstroke Morphology Reveals Near-Surface Transmural Propagation Direction, 277

Connective tissue growth factor

Endothelin-1, via ET_A Receptor and Independently of Transforming Growth Factor- β , Increases the Connective Tissue Growth Factor in Vascular Smooth Muscle Cells, 125

Connexin

Heterocellular Contact at the Myoendothelial Junction Influences Gap Junction Organization, 44

Connexin 40

Rapid Endothelial Cell-Selective Loading of Connexin 40 Antibody Blocks Endothelium-Derived Hyperpolarizing Factor Dilation in Rat Small Mesenteric Arteries, 399

Connexin43

Enhanced Functional Gap Junction Neofunction by Protein Kinase A-Dependent and Epac-Dependent Signals Downstream of cAMP in Cardiac Myocytes, 655

Contractility

Phospholipase C ϵ Modulates β -Adrenergic Receptor-Dependent Cardiac Contraction and Inhibits Cardiac Hypertrophy, 1305

Targeting of a Novel Ca²⁺/Calmodulin-Dependent Protein Kinase II Is Essential for Extracellular Signal-Regulated Kinase-Mediated Signaling in Differentiated Smooth Muscle Cells, 541

Coronary artery disease

Asymmetric Dimethylarginine and the Risk of Cardiovascular Events and Death in Patients With Coronary Artery Disease: Results from the AtheroGene Study, e53

Impaired CXCR4 Signaling Contributes to the Reduced Neovascularization Capacity of Endothelial Progenitor Cells From Patients With Coronary Artery Disease, 1142

Cre-LoxP system

Alk3/Bmpr1a Receptor Is Required for Development of the Atrioventricular Canal Into Valves and Annulus Fibrosus, 219

Targeted Disruption of *Smad4* in Cardiomyocytes Results in Cardiac Hypertrophy and Heart Failure, 821

CRP

Proapoptotic, Antimigratory, Antiproliferative, and Antiangiogenic Effects of Commercial C-Reactive Protein on Various Human Endothelial Cell Types In Vitro: Implications of Contaminating Presence of Sodium Azide in Commercial Preparation, 135

 α B-crystallin

Intrasarcoplasmic Amyloidosis Impairs Proteolytic Function of Proteasomes in Cardiomyocytes by Compromising Substrate Uptake, 1018

CUG repeats

Nuclear RNA Foci in the Heart in Myotonic Dystrophy, 1152

Cytokines

Exogenous High-Mobility Group Box 1 Protein Induces Myocardial Regeneration After Infarction via Enhanced Cardiac C-Kit⁺ Cell Proliferation and Differentiation, e73

Cytoskeleton

Activation of the Endothelial Store-Operated I_{SO} Ca²⁺ Channel Requires Interaction of Protein 4.1 With TRPC4, 1164

D**Deacetylation**

Pre-B-Cell Colony-Enhancing Factor Regulates NAD⁺-Dependent Protein Deacetylase Activity and Promotes Vascular Smooth Muscle Cell Maturation, 25

Desmin-related cardiomyopathy

Intrasarcoplasmic Amyloidosis Impairs Proteolytic Function of Proteasomes in Cardiomyocytes by Compromising Substrate Uptake, 1018

Development

Noonan Syndrome Mutation Q79R in Shp2 Increases Proliferation of Valve Primordia Mesenchymal Cells via Extracellular Signal-Regulated Kinase 1/2 Signaling, 813

Diabetes

Activation of the Sphingosine Kinase-Signaling Pathway by High Glucose Mediates the Proinflammatory Phenotype of Endothelial Cells, 891

Vascular Neointimal Formation and Signaling Pathway Activation in Response to Stent Injury in Insulin-Resistant and Diabetic Animals, 725

Diaminofluorescein

Carbon Monoxide From Heme Oxygenase-2 Is a Tonic Regulator Against NO-Dependent Vasodilation in the Adult Rat Cerebral Microcirculation, e104

Digitalis

Phospholemman: A New Force in Cardiac Contractility, 510

E**E-C coupling**

Paradoxical Cellular Ca²⁺ Signaling in Severe but Compensated Canine Left Ventricular Hypertrophy, 457

Early growth response gene

Interleukin-10 Suppresses Tissue Factor Expression in Lipopolysaccharide-Stimulated Macrophages via Inhibition of Egr-1 and a Serum Response Element/MEK-ERK1/2 Pathway, 305

EET

EDHF Redux: EETs, TRPV4, and Ca²⁺ Sparks, 1209

Eicosanoids

TRPV4 Forms a Novel Ca²⁺ Signaling Complex With Ryanodine Receptors and BK_{Ca} Channels, 1270

Elastin

Increased Fibulin-5 and Elastin in S100A4/Mts1 Mice With Pulmonary Hypertension, 596

Electrophysiology

Antiarrhythmic Engineering of Skeletal Myoblasts for Cardiac Transplantation, 159

Beware of Cells Bearing Gifts: Cell Replacement Therapy and Arrhythmic Risk, 99

Vascular Remodeling Versus Vasoconstriction in Chronic Hypoxic Pulmonary Hypertension: A Time for Reappraisal?, 95

Vascular smooth muscle

cAbl Tyrosine Kinase Mediates Reactive Oxygen Species- and Caveolin-Dependent AT₁ Receptor Signaling in Vascular Smooth Muscle: Role in Vascular Hypertrophy, 829

Heme Is a Carbon Monoxide Receptor for Large-Conductance Ca^{2+} -Activated K^+ Channels, 805

Mitochondria-Derived Reactive Oxygen Species Dilate Cerebral Arteries by Activating Ca^{2+} Sparks, 354

Potassium Channels and Proliferation of Vascular Smooth Muscle Cells, 1211

Pre-B-Cell Colony-Enhancing Factor Regulates NAD⁺-Dependent Protein Deacetylase Activity and Promotes Vascular Smooth Muscle Cell Maturation, 25

SRF Function in Vascular Smooth Muscle: When Less is More?, 409

Thyroid Hormone Targets Matrix Gla Protein Gene Associated With Vascular Smooth Muscle Calcification, 550

The Translation of Transcription, 1083

TRPV4 Forms a Novel Ca^{2+} Signaling Complex With Ryanodine Receptors and BK_{Ca} Channels, 1270

Vascular smooth muscle cell proliferation

Bone Morphogenetic Protein 4 Promotes Pulmonary Vascular Remodeling in Hypoxic Pulmonary Hypertension, 496

Sarco/Endoplasmic Reticulum Ca^{2+} -ATPase Gene Transfer Reduces Vascular Smooth Muscle Cell Proliferation and Neointima Formation in the Rat, 488

Vascular smooth muscle cells

Aldosterone and Angiotensin II Synergistically Induce Mitogenic Response in Vascular Smooth Muscle Cells, 434

Bone Morphogenetic Proteins in Vascular Calcification, 105

Calreticulin Destabilizes Glucose Transporter-1 mRNA in Vascular Endothelial and Smooth Muscle Cells Under High-Glucose Conditions, 1001

Contribution of Kv Channels to Phenotypic Remodeling of Human Uterine Artery Smooth Muscle Cells, 1280

Depletion of Serum Response Factor by RNA Interference Mimics the Mitogenic Effects of Platelet-Derived Growth Factor-BB in Vascular Smooth Muscle Cells, 427

Endothelin-1, via ET_A Receptor and Independently of Transforming Growth Factor- β , Increases the Connective Tissue Growth Factor in Vascular Smooth Muscle Cells, 125

Increased Fibulin-5 and Elastin in S100A4/Mts1 Mice With Pulmonary Hypertension, 596

Increased Neointima Formation in Cysteine-Rich Protein 2-Deficient Mice in Response to Vascular Injury, 1323

Platelet-Derived Growth Factor D Induces Cardiac Fibrosis and Proliferation of Vascular Smooth Muscle Cells in Heart-Specific Transgenic Mice, 1036

Vascular tone

Arrestin-Independent Internalization and Recycling of the Urotensin Receptor Contribute to Long-Lasting Urotensin II-Mediated Vasoconstriction, 707

Carbon Monoxide From Heme Oxygenase-2 Is a Tonic Regulator Against NO-Dependent Vasodilatation in the Adult Rat Cerebral Microcirculation, e104

Recent Developments in Vascular Endothelial Cell Transient Receptor Potential Channels, 853

Vasculogenesis

Endothelial Progenitor Cells: Unexpected Disclosures, 299

Vasodilation

Effects of D-4F on Vasodilation and Vessel Wall Thickness in Hypercholesterolemic LDL Receptor-Null and LDL Receptor/Apolipoprotein A-I Double-Knockout Mice on Western Diet, 1190

Heme Is a Carbon Monoxide Receptor for Large-Conductance Ca^{2+} -Activated K^+ Channels, 805

Mitochondria and Reactive Oxygen Species: An Evolution in Function, 302

Mitochondria-Derived Reactive Oxygen Species Dilate Cerebral Arteries by Activating Ca^{2+} Sparks, 354

TRPV4 Forms a Novel Ca^{2+} Signaling Complex With Ryanodine Receptors and BK_{Ca} Channels, 1270

Ventricles

Differences Between Left and Right Ventricular Chamber Geometry Affect Cardiac Vulnerability to Electric Shocks, 168

Ventricular myocytes

Ca^{2+} Influx-Induced Sarcoplasmic Reticulum Ca^{2+} Overload Causes Mitochondrial-Dependent Apoptosis in Ventricular Myocytes, 1009

Crosstalk of β -Adrenergic Receptor Subtypes Through G_i Blunts β -Adrenergic Stimulation of L-Type Ca^{2+} Channels in Canine Heart Failure, 566

The Enigma of β_2 -Adrenergic Receptor G_i Signaling in the Heart: The Good, the Bad, and the Ugly, 507

Ventricular tachycardia

Enhanced Store Overload-Induced Ca^{2+} Release and Channel Sensitivity to Luminal Ca^{2+} Activation Are Common Defects of RyR2 Mutations Linked to Ventricular Tachycardia and Sudden Death, 1173

Vessel stabilization

Endothelial Extracellular Matrix: Biosynthesis, Remodeling, and Functions During Vascular Morphogenesis and Neovessel Stabilization, 1093

Virtual electrode polarization

Differences Between Left and Right Ventricular Chamber Geometry Affect Cardiac Vulnerability to Electric Shocks, 168

Voltage-sensitive dye

Optical Action Potential Upstroke Morphology Reveals Near-Surface Transmembrane Propagation Direction, 277

W**Wnt**

Phosphatidylinositol 3-Kinase-Akt Pathway Plays a Critical Role in Early Cardiomyogenesis by Regulating Canonical Wnt Signaling, 144

Y**Y-27632**

Inhibition of Rho-Kinase Attenuates Hypoxia-Induced Angiogenesis in the Pulmonary Circulation, 185

Yap1

Redox-Dependent Transcriptional Regulation, 967
